Key Skills

Windows Administration
System Troubleshooting
Networking Fundamentals (TCP/IP, DNS, DHCP)
Active Directory Management
Cloud Computing (AWS, Azure)
Event Viewer & Security Logs
Operating Systems (Windows, Linux)
PowerShell & Command Prompt
Epic / PACS Systems
Software Configuration & Installation
Technical Documentation
Windows Security & Access Controls

Education

Georgia Gwinnett College
Bachelor of Science,
Information Technology (Systems & Security)
May 2026

Certifications

Microsoft Technology Associate (MTA)
Networking Fundamentals
January 2021
AWS Certified Cloud Practitioner
November 2025

Professional Summary

IT graduate (Systems & Cybersecurity) with 18+ years supporting healthcare technology operations. Experienced in troubleshooting, Epic/PACS workflows, documentation, and urgent issue escalation. Developing Windows administration and networking skills through documented labs; seeking an entry-level IT support or systems administration role.

Technical Projects

IT Systems Administration Labs

- Performed Windows administration and troubleshooting using Task Manager, Services, System Configuration, Event Viewer, and system recovery tools.
- Configured and tested local security policies, user permissions, logon restrictions, and Windows event auditing.
- Documented technical procedures, troubleshooting observations, and system configurations through GitHub case studies.

Windows Security Administration Lab

- Analyzed Windows security logs using Event Viewer to investigate authentication events
- Configured Windows Defender Firewall rules and documented endpoint security controls

Experience

November 2024 - Present

Lead Cardiac Monitor Technician • Kansas University Medical Center

- Support operation and troubleshooting of centralized patient monitoring systems, coordinating equipment issues and workflow concerns with clinical teams.
- Create and maintain operational documentation, workflows, and training resources to support consistent system use and department processes.
- Serve as an escalation resource between clinical staff, leadership, and support teams to troubleshoot operational issues, coordinate resolutions, and maintain continuity of patient monitoring systems.

March 2006 - May 2024

Radiology Coordinator • Piedmont Athens Regional Medical Center

- Supported clinical applications and imaging workflows including Epic, PACS, radiology systems, and modality integrations across a high-volume healthcare environment
- Assisted with downtime procedures, workflow changes, and resolution of technology-related issues impacting patient care operations
- Supported Epic/PACS workflows and managed PowerShare access for external healthcare facilities and cardiac device vendors to facilitate secure imaging exchange
